I think this game will be very good. I just need to get into it a little more. I seem to be having some issues with the FPS I try everything possible to fix this. I might just need some help on it. My system is more than good enough to run this game so I dont know what the issue is. I have a video posted below so you can see first hand some of the gameplay. Sorry for the FPS like I said I could not figure out how to fix it.

Also when I was trying to do the next level it woud not go past the loading screen for at least 3 mins I would wait a few weeks on this game. But I do seeing it being a good game so I am about 70\/30 right now.

Update: The game keeps crashing on me so I would wait for a few weeks till this has been fixed.

https:\/\/www.youtube.com\/watch?v=t-pXmqaH1BM. ironkraft road to hell is actually a video game to hell, its like trials meets ww2 shooter but not executed very well ,i played it but the menu dosent work properly, i cant even get past the tutorial because the cutscene dosent let me do a damn thing. the graphics is very plain not a lot of options to choose from just high medium low graphic settings , if you dont want this game reviewed by totall biscuit or nerd cube i would hurry up because this game has potential, but the game could do with some love (nazi killing love) thanks.
